**(54) UMBRELLA  
CONTAINER BURIED IN  
CAR DOOR**

**(57) Abstract:**

**PURPOSE:** To simplify the treatment of a wet umbrella in a car by burying an umbrella container in a car door to contain the umbrella wetted by rain.

**CONSTITUTION:** A comparatively shallow space for an umbrella container is provided aslant on the inside of a car door. The umbrella container is constructed of a main body 2 easy to be opened and closed as pivoted at the lower end and a waterproof cloth or a vinyl sheet 3 to cover the upper part as the main body 2 is opened and an umbrella 1 is positioned to be contained, and a drain tube 10 is connected to its lower part. In this construction, when the umbrella container is unused, the main body 2 is contained in the umbrella-containing space on the inside of the car door together with the sheet 3 without giving any hindrance. For containing the umbrella 1, the container can be easily set to contain, and the wet umbrella 1 can be held inside without giving any trouble to

driving and other actions.
